(54) Title: A SUPPORT ELEMENT FOR AN EXTRACORPOREAL FLUID TRANSPORT LINE

(57) **Abstract:** A description is given of a rigid support element for an infusion line for medical use, comprising a first and a second portion (20, 22) rigidly connected to each other and capable of holding a first length of tubing (18). The first portion (20) incorporates a continuous separator (10) for separating fluid into a gaseous portion and a liquid. This separator comprises a containing body formed on the support element and a pair of membranes, one hydrophobic and one hydrophilic, interacting with each other.
